

SME Mart — Engagement Architecture & Transparency Model

Board partitions, readiness dimensions, entangled task pairs, and boundary categories

■ Engagement ■ Lifecycle ■ Buyer (Demand) ■ Shared (Transparency) ■ Provider (Supply) ■ Entangled Pairs
■ Readiness Dims ■ Audit (3rd Party) ■ Boundary

← demands →

REQ ↔ SAT

← satisfies →

Audit (3rd Party Assessor)**Assessor View**

Role-scoped perspective

Read-Only Entangled Pairs

Reads transparency records

Independent Verification

Assessor's own tasks

Assessor Demands

Any party can create demands

Assessors read entangled pairs + create their own demands – N parties supported, not limited to 2

↓ spans 0..N

Boundary(ies)

Infra

Apps

Policies

Legal Reqs

License Reqs

Parties (int/ext)

Evidence (pipelines/hub)

Board Scope: ORG | BOUNDARY | PROJECT | USER

board.partition (6 values)

- > **BUYER** Demand-side requirements
- > **PROVIDER** Supply-side deliverables
- > **SHARED** Joint milestones visible to both
- > **ENGAGEMENT_SETUP** Vetting & onboarding
- > **CLOSEOUT** Closure & sign-off
- > **AUDIT** Third-party assessor tasks

board.scope (4 values)

- > **ORG** Board owned by an organization
- > **BOUNDARY** Board owned by a boundary
- > **PROJECT** Board owned by a project
- > **USER** Board owned by a user

Readiness Dimensions (5)

- > **Legal** Legal readiness assessment
- > **Financial** Financial readiness assessment
- > **Cyber** Cybersecurity/compliance readiness
- > **Clinical** Healthcare-specific readiness
- > **Functional** Functional outcomes readiness

Boundary Types (Brian's Miro)

- > **Infra** AWS infrastructure
- > **Apps** Application-level
- > **Policies** Policy & security
- > **Legal Reqs** Legal compliance
- > **License Reqs** Licensing

Visibility Rules

- > Each party sees ONLY their partition + SHARED
- > SHARED shows ONLY explicitly submitted items
