Title: AAH Hardware Asset Management (HAM)		Document Number: 63312
Document Type: ☒ Policy ☐ Procedure ☐ Guideline ☐ Other		Last Review/Revision Date: 05/27/2021
Content Applies to Patient Care: (Select all that apply) ☐ Adults ☐ Pediatrics (Under 18)	Content Applies to: (Select One) ☐ Clinical ☒ Administrative	Next Review Date: 05/27/2024
		Effective Date: 05/27/2021
Scope: ☒ AAH System ☐ ACH ☐ AAH IL Only ☐ AAH WI Only ☐ Site Only (Location Name): ☐ Department Only (Department Name):		

I. PURPOSE

The purpose of this policy is to establish the Advocate Aurora Health (AAH) Hardware Asset Management (HAM) Policy requirements for all AAH team members.

II. SCOPE

This policy applies to Advocate Aurora Health, Inc. and any entity or facility owned and controlled by AAH.

III. DEFINITIONS/ABBREVIATIONS

Advocate Aurora Health - AAH

Asset Reconciliation - Detailed review and normalization of the organizations data to clearly define the state of program assets

Business Associate - Shall have the same meaning as the term “business associate” at 45 CFR §160.103.

COD - Certificate of destruction

Deployment and Redeployment – The process responsible for configuring, assigning, and distributing hardware assets into the production environment.

Disposal – The process for tracking and documenting hardware asset destruction by engaging a disposal vendor and receiving a certificate of disposal.

Endpoint Device- an Internet-capable computer hardware device on a TCP/IP network. The term can refer to desktop computers, laptops, smart phones,

tablets, thin clients, printers or other specialized hardware such as sensors, actuators, and point of sale (POS) terminals.

Hardware Asset Management – HAM

HIT Asset – Any item of value that (Health Information Technology (HIT) must track and manage

High Risk Hardware – Inclusive of: Desktops, mobile devices, network equipment, storage equipment, servers, firewalls, printers, encrypted flash drives, hard drives, and with data stored containing Information Classification 3 or 4 as defined in the AAH Information Classification Policy.

Health Informatics and Technology - HIT

IT Secure Area – A physical space within an AAH facility where there is a concentration of information system components (e.g., server rooms, media storage areas, data and communication centers

Low Risk Hardware - Inclusive of: Accessories, cables, carts, batteries & power cords, monitors, digital sign tracking boards, laptop mounts, keyboards, medical imaging graphic cards, phones, headsets, webcams, and mounts.

Management/ Operation -The process for monitoring, controlling, and repairing hardware assets in the production environment and stockroom locations.

Personally Identifiable Information: PII

Payment Card Industry: PCI Data

Protected Health Information: PHI

Point of Sale- POS

Procurement/ Acquisition - The process for purchasing hardware assets.

Reclamation - Recovery of off-site Hardware Assets from a Remote Worker.

Subcontractor - Subcontractor (also known as Third Party): An entity or person other than the vendor that offers to furnish goods or services of any kind under the contract.

Useful Life: The timeframe that signifies the functional and financial value deterioration of a hardware asset.

Vendor - An external party providing paid goods or services to Advocate Aurora Health Care.

IV. POLICY

AAH will ensure adherence to industry best practice standards and regulatory requirements for HAM to include the following: procurement/acquisition, deployment/redeployment, maintenance/operations, reclamation, disposal/destruction, and reconciliation.

AAH HIT is responsible to ensure that fiscal planning and capital is available for updating hardware when it reaches its end of life.

A. HAM Requirements

1. Hardware Asset Inventory
 - a. AAH shall create, update, and maintain a hardware asset inventory program to manage all HIT hardware assets.
2. HAM shall follow Finance policies (where applicable to HIT):
 - a. Fixed Asset Receiving Tagging and Tracking
 - b. Physical Inventory of Capital Assets
 - c. Fixed Asset Disposal and Transfer
3. Maintain a controlled inventory within a secure location to ensure that hardware assets are received and disposed of according to law and regulation.
4. All HIT hardware assets will have a default useful life of 5 years. Hardware assets may have a different useful life based on business need and security and technology requirements.
 - a. The AAH HIT HAM program will maintain a HIT HAM payment matrix of who is responsible and communicate as hardware reaches end of useful life or based on business need.
 - b. To request a copy of the HIT HAM payment matrix, reach out to the HIT Business Office.

B. Lost/Stolen

Any lost or stolen assets shall be reported per the AAH Integrated Desktop/Laptop Security policy, AAH Cybersecurity Incident Response policy, and AAH HIT Lost/Stolen workflow.

C. Procurement/Acquisition

All procurement of HIT assets must go through AAH HIT business office.

D. Deployment and Redeployment

1. High risk hardware assets that contain restricted information must be configured prior per the HIT HAM standard prior deployment into the AAH environment.
2. Any endpoints containing PHI, PCI, or PII (as defined in the AAH Information Classification policy) used by an AAH team member redeployed to another team member must be reimaged prior to redeployment.

E. Maintenance/Operations

1. Assets must be received per the HIT HAM Standards, placed in secure inventory location, and follow inventory updating requirements per above IV.a.1.a.
2. Any HIT team members involved in HIT HAM asset operations is responsible for understanding and following HIT Asset management Standards and workflows.

F. Reclamation

1. When a team member transfers to a different role or separates from the organization, the team member's leader must contact the Service Desk to ensure hardware assets are transferred or reclaimed per HIT HAM Standards.
2. For Remote Workers, refer to AAH Remote Worker Procedure for Hardware Reclamation.

G. Disposal

1. Assets must be appropriately disposed of at the end of their useful life unless an exception is granted and:
2. Must be disposed of following defined HIT HAM Standards.

H. Destruction

1. AAH HIT must maintain records of COD and manifest for destruction.
2. Any hardware asset that is high risk and has confidential information the device must be protected and/or destroyed per AAH Disposal of Protected Health Information or Other Restricted Information policy.

I. Hardware

All high-risk hardware will be supported through end of useful life. The HIT Business Office will maintain a list of approved high-risk hardware with make, model, and manufacturer for organizational use.
